

AYSE HILAL “SARAH” YALCINER

SENIOR SOFTWARE DEVELOPER

437-985-0691 | aysehilalyalciner@gmail.com | Markham, ON | github.com/ayshilal

Summary of Qualifications

- 6+ years of .NET, C# development experience
- 3+ years of full-stack web application development experience
- 1+ year of Node JS, Angular 6 experience
- Front-end experience in Node JS, CSS, HTML, JavaScript, Bootstrap and JQuery
- Deep knowledge in Web Services/REST architecture concepts, JSON
- Proficiency in database concepts such as SQL, AWS, MongoDB and Elastic Search
- Always open to embrace new technologies and programming languages
- Strong work ethics and collaborative team player

Professional Experience

VERISOFT GROUP, Istanbul – Toronto (Remote 12/2018 – 6/2019)

3/2018 to 6/2019

Senior Software Developer

2018 KAD-SIS: Online Banking App for Istanbul Gold Refinery

VERISOFT

Gold is the second most popular asset in Turkey. Therefore, Istanbul Gold Refinery is using the Kad-sis project to turn gold into a modern digital asset. It provides a mobile wallet for users to trade gold with true price in the market. The modules of the project enables a secure and real-time system for users, a simple approval workflow for merchants and best management practices such as fast decision making and fraud detection for Istanbul Gold Refinery. Website: <http://www.kadsis.com/>

Technology: Angular 6, C# 7, .NET Core 2.2, MSSQL, Nlog, VS Code

- Designed and developed web API in .NET Core 2 using Clean Layered Architecture from scratch.
- Implemented front-end side to handle complex scenarios by rich user experiences using Angular 6, Typescript.
- Mentored junior team members for .NET Core 2 fundamentals. Passed knowledge on working with databases using Entity Framework Core and migration management.
- Owned responsibility of GitLab project management flow (CI/CD pipelines for automated testing and publishing)
- Worked with Agile/Scrum environment to ensure project timelines were met.

2018 myGini: Mobile Banking App for Banks and Financial institutions

VERISOFT

myGini is an integrated payment and shopping app that delivers the ultimate “win-win-win” for financial institutions, cardholders, and retailers. By serving as a bridge between MasterCard/Visa networks and financial institutions, myGini offers cardholders a superior shopping experience, while increasing transactional volume for retailers and financial institutions. Its real-time push notifications bring banking and credit card rewards together. Website: <https://mygini.com/>

Technology: C#, .NET MVC Entity Framework, AWS, Web API (RESTful API), PostgreSQL

- Implemented Web API, REST-based services for both mobile and web services.
- Built complex custom functions in PostgreSQL.

MLPCARE, Istanbul, TURKEY

4/2013 to 3/2018

Software Developer

2018 MLPPatient: Cross-Platform Mobile Application for Patients

MLPCARE

This cross-platform mobile application is for patients to reach their medical profile via their smartphones, track their health data such as reviewing medical history, analyzing test results, creating an appointment and contacting the doctor.

Technology: *C#, XAMARIN.Forms, .NET Core MVC Entity Framework. Web API (RESTful API), MSSQL, TFS*

- Implemented Web API, REST-based services.

2016 Reflex: Web Application for Physicians

MLPCARE

The project aims to provide a multipurpose interface for physicians to easily perform daily tasks such as browsing patient medical cards, medical reports, doctor agenda, surgery planning and laboratory requests.

Technology: *C#, .NET MVC Entity Framework, MS-SQL, Elastic Search, MongoDB, Web API (RESTful API), Bootstrap, JavaScript, jQuery, Angular4, Ajax, HTML5, CSS3, JSON, TFS Version Control. Before starting this project we had supported with MVC Certificate Program by Microsoft*

- Built and maintained applications with .NET 4x, ASP.NET, MVC, C# and SQL Server 2012/2014
- Wrote unit/integration test cases and automated test cases with Selenium.
- Work as an agile team member to improve project outcome.

2014-2015 MLPDoctor: IOS/Android Mobile Application for Physicians

MLPCARE

An iOS application for physicians to easily perform daily tasks such as browsing patient medical cards, reports, agenda, surgery and laboratory requests.

Technology: *Objective-C, Web API (RESTful API), XAMARIN, XCode. Before starting this project we had supported with iOS Mobile Application Development Course by Apple Co. Turkey*

2013-2014 Overtime Reporting, WinForm Application

MLPCARE

A project for center management to analyze the overtime payments for more than 10.000 nurse employees. Nurses are working in interchanging shift schedules in various types and the project goal is to calculate overtime pay for better management.

Technology: *C#, DevExpress, WCF SOAP, ADO.NET Entity Framework (T-SQL), MS-SQL*

- Implemented several WCF Services to exchange medical data with independent laboratories and medical firms.

2013-2014 Hospital Event Notification, WinForm Application

MLPCARE

Event Notification System used to report any unusual occurrence by hospital employees. Collected data is used by physicians and chief of medicine to prevent further occurrences.

Technology: *C#, WCF SOAP, ADO.NET Entity Framework (T-SQL), MS-SQL, DevExpress.*

- Developed a remote service control system to monitor 24-hour working software for minimizing downtime in hospitals.

Certificates & Workshops

2020 | Angular and Typescript, TestDome

2019 | AWSome Day Online, Amazon Web Services

2017 | Angular 4 Certificate, Microsoft

2017 | Advanced SQL and Tuning Certificate, Microsoft

2016 | ASP.NET MVC5 Development Certificate, Microsoft

2015 | iOS Devices and Development Workshop, Apple

2014 | Certificate of Attendance 9th International METU Robotics Days, METU University

Education

MS in Engineering, Electrical and Electronics Engineering – Istanbul University, Turkey (2010 – Dropped after courses completed with 3.15 GPA)

BS in Engineering, Computer Engineering Fatih University, Turkey (2005 - 2010)
